

Atlantic's Trumpeter Swans

Swan Viewing Etiquette

1. All animals need food, water, shelter and space to survive. Please give the swans their space and, even though they are not dangerous animals, never approach them. The swans may choose to approach you if you are feeding them, but they will remain cautious and any move towards them will scare them away. Please avoid startling the swans by not approaching them.
2. Please do not remove corn from the blue feeder or surrounding barrels, there is a volunteer that routinely feeds the swans from this limited food supply.
3. If you plan on feeding the swans, you must have corn, as mold can kill swans. Please do not over feed the swans. Excess (uneaten) corn will quickly mold!
4. Any four-legged animal is viewed as a predator to swans. Even your friendly dog is enough to scare the swans away, please leave pets at home.
5. Please don't ice fish close to the swan feeder, or swans. Another location would be ideal.

The Cass County Conservation Board would like to remind you of the important role we are all playing in the reintroduction of Trumpeter Swans, please be respectful and do your part in providing them a space where they can feel safe.

Arrival and Departure Dates and Number of Swans at Atlantic Quarry

1997/1998	December 18 – January 2	(4 swans)
1998/1999	Nothing on record	
1999/2000	December 25 – February 15	(4 swans)
