

# Atlantic's Trumpeter Swans

## Swan Viewing Etiquette

1. All animals need food, water, shelter and space to survive. Please give the swans their space and, even though they are not dangerous animals, never approach them. The swans may choose to approach you if you are feeding them, but they will remain cautious and any move towards them will scare them away. Please avoid startling the swans by not approaching them.
2. If you plan on feeding the swans, you must have fresh corn, as mold can kill swans. Please do not over feed the swans. Excess (uneaten) corn will quickly mold!
3. Any four-legged animal is viewed as a predator to swans. Even your friendly dog is enough to scare the swans away, please leave pets at home.
4. Please don't ice fish close to the swans. Another location would be ideal.

The Cass County Conservation Board would like to remind you of the important role we are all playing in the reintroduction of Trumpeter Swans, please be respectful and do your part in providing them a space where they can feel safe.
